Rev. J. R. Hague Appointed By Bishop Sherman

Will Commence Services for St. Alban's and St. Luke's on May 29—Bishop Will Held Induction.

In a letter to the wardens of the Anglican churches at Coleman and Blairmore, Rt. Rev. L. Ralph Sherman, D.D., bishop of Calgary, states that Rev. John Rayson Hague is willing to accept the appointment to these parishes.

He has worked successfully in the Diocese, both as a student before his ordination and after, at Foremost, Coutts, Milk River, Warner and many other points in the south country. He has his theological degree from St. John's College, Winnipeg, and was ordained deacon in 1936 and priest in 1937.

His first service here will be held on Sunday, May 29, at 7 p.m., and at Blairmore in the morning of the same day. Induction services will be held on Wednesday, June 1, at 7 p.m. in Blairmore, and at 8:30 p.m. in Coleman. Following the service in Coleman, a parochial gathering will be held in the parish hall, to which all church members are invited. The bishop will remain for this gathering.

On Sunday evening a meeting of St. Alban's vestry was held, when a financial report was submitted, showing an indebtedness of \$100. Members of the congregation or church supporters are asked to contribute towards wiping this out, if they have not already done so.

A canvass will also be made to ascertain the amount of financial support forthcoming to maintain the church services and also to renovate the buildings. The vestry aims at raising \$1,000 for the expenses of the balance of the year. It is hoped that all who are members of the Anglican church will support this appeal as liberally as possible.

STEVE WRITES FROM BAGHDAD

Continuing his travels, Steve Janosik sends a photographic postcard from Baghdad, Iraq, the postmark being dated April 15. "We don't know how he does it but he's," might well be applied to the way in which Steve travels in various countries of the world and overcomes difficulties of language in meeting people.

Another postcard received this morning from Steve Janosik, is dated Bombay, India, April 23. He surely keeps a-going.

A tea and pantry sale in aid of St. Alban's Ladies Guild will be held at Mrs. Halliwell's home on Saturday, May 28 from 3 to 6 p.m.

HOUSE BUILT ON A LOT THAT WASNT REALLY A LOT.

Caused a Problem for Owner and Town Council Which Has Been Satisfactorily Solved.

Many years ago, Dave Gillespie built a house on Fifth street. As the years passed, he improved the property by fencing it and cultivated a nice garden, planting trees and shrubs of considerable value. As long as the tide of settlement did not sweep eastward, all was well. But increased demand for building lots led to the discovery that Dave's house had been built on an avenue instead of a surveyed lot.

The council deliberated on the problem, and came to the conclusion that the house would have to be moved. Naturally there was objection on the owner's part, for it was not his error in the first place, but the agent of the original owner of the land which was sub-divided.

It was in a plot owned by Capt. Beebe, of Blairmore, and his agent here, reported to have been J. Stevenson, counted the lots the wrong way, with the result that Dave was placed on the avenue, and the lot at the other end of the block changed places.

Further deliberations by the mayor and council evolved a satisfactory settlement of the problem. Dave's house and garden will remain where it is, and the avenue will be on the lot west of him, while another house south of the disputed lot will be moved. All's well that ends well, agrees Dave, though for a time it caused no small consternation.

Legion Carnival June 11 and 13 In Arena

Proceeds for Club Building Fund and Major Prizes to be Raffled.

The third annual carnival of Coleman Branch of the Canadian Legion is being an energetic committee, and the major prizes are a 6-piece chesterfield suite and a 4-piece walnut bedroom suite with English plate-glass mirror. Tickets are now on sale. Most of the activities will be in the booths, including the Charlie McCarthy booth.

Posters are being issued, giving complete details of the program, for enthusiastic public support in their endeavor to erect a club building.

VICTORIA DAY CELEBRATION AT BELLEVUE

The fourth annual celebration, arranged by Rev. R. Upton, of Bellevue United church, and his enthusiastic committee, to be held on Tuesday, May 24, promises to eclipse all previous efforts in this neighborhood. The complete details of the program, and is commended to the support of the people of "The Pass" towns. The crowning of the May Queen always arouses widespread interest, and votes are secured on the basis of tickets sold by the six charming young ladies who are candidates. The sports program will be held in the arena, and the posters printed at The Journal office indicate that it will provide splendid entertainment. Children of the Polish society, Coleman will take part in folk dances.

Miners' Vote Shows Divided Opinions on Union

Contention Arises Over Result—Local Association Claim Two-Thirds Majority Required to Carry Vote.

A pit-head ballot Tuesday by Coleman miners worked to determine if they were in favor of becoming members of the United Mine Workers of America, the second within the past year. The results indicate that 76 per cent of the miners in favor of the union, but a two-thirds majority was required to carry the vote. For the same period the organizations, which are really the church, have held their place in the community.

The church records show that not only the actual membership and their families, but literally hundreds of people besides, have availed themselves of the necessary services that the church can offer.

To any who remain, who in the early years worked to establish this organization, this anniversary occasion will be a matter of great satisfaction. The name of Murray will always be remembered in Coleman as that of the first minister of the congregation, who in the newly developing mining camp was able to help so many people.

For the anniversary services the Rev. Robt. MacGowan, of Pincher Creek, will be the special preacher and will bring messages at both services. Mrs. Upton, of Bellevue, will sing at the morning service. The morning service will begin at 10:45, fifteen minutes earlier than usual. Large congregations are expected and cordial invitation is extended to all the friends of the church to attend.

To Those Workers In The Dark

(By George Matthew Adam in the Tulsa (Oklahoma) World.)

Little do we think of that vast army of workers, whose life is spent largely under the ground—digging and mining for the rich substance in the earth that does so much to contribute to human happiness and to progress.

We see smoke pouring out of great furnaces that melt up ore, which later in masses of steel are turned out to power in the air of our modern sky-scrapers. Also in the modern tractors that net all countries, and in the automobiles that creep, like ants now, over every portion of the earth. Metals of all kinds—out of the ground, mined by those who see little of the sunlight and beauties of nature.

I never view a load of coal, or note the smoke of a city without thinking of those workers in the dark, far under the surface of where we walk. In one place, Scranton, Pennsylvania, the very city rests upon a network of coal mines where workers toil in the dark. By the dark I mean that they have no natural light—the light of the day—for they work wholly by artificial light and small lamps.

Most of these workers have families as well as little of them. They are strong, brave men, however, and their children later help to form the backbone of a nation.

Here are workers who deserve the highest compensation for their toil. Without their service human progress would not be what it is today.

These underground workers are often faced with danger and unexpected tragedy. Like soldiers they perform their tasks, thinking of those above dependent upon them.

CONSERVATIVE CONVENTION AT MACLEOD MAY 18

The Conservative party is returning to life in this Federal constituency of Macleod, at present represented at Ottawa by Rev. E. G. Hansell, one of Premier Abernethy's lieutenants, and at times preacher at the Prophetic Bible Institute.

On Wednesday next the supporters of the Conservative party will meet at Macleod at 3 p.m., to elect officers for the constituency and to elect delegates to attend the National Conservative convention to be held in Ottawa on July 6, 7 and 8. The meeting called by G. R. Davis, president of the association, and a good representation from all parts of the riding is urgently required. Those intending to go should advise Col. H. F. Barnes at his law office.

United Church Thirty-Second Anniversary

The congregation of the United Church will celebrate the thirty-second anniversary of the opening of their church on Sunday. This is an important occasion for United Church people and their friends in Coleman.

For more than a generation the church building has occupied one of the principal locations in the town. For the same period the organizations, which are really the church, have held their place in the community. The church records show that not only the actual membership and their families, but literally hundreds of people besides, have availed themselves of the necessary services that the church can offer.

To any who remain, who in the early years worked to establish this organization, this anniversary occasion will be a matter of great satisfaction. The name of Murray will always be remembered in Coleman as that of the first minister of the congregation, who in the newly developing mining camp was able to help so many people.

COLEMAN HOMING SOCIETY OPENS 1938 SEASON

With Race From Nanton, May 1st.

With practically no visibility in the Crow's Nest Pass, and liberated in rain, snow, and against a strong west wind at Nanton, the birds showed real mettle against such adverse elements in flying the distance of sixty miles under three hours.

This race, mostly a trial flight for birds bred last year, and a warm up for stock birds that will compete this year, was put on instead of the scheduled race from Calgary, the April weather being unfavorable for training this year.

The most pleasing feature of the race was that it was won by a newcomer to the club, Mr. G. "Shorty" Rayman. ("Atta-boy Shorty!")

The result: G. Rayman, first; A. Biggan, second; W. Pryde, third; Fred Beedington, fourth; M. Tarcom, fifth; H. Davis, sixth. Four lofts failed to clock in.

With officers re-elected from the previous year, namely: C. Makin, president; A. Biggan, vice-president; F. Beedington, secretary, the Coleman Club has a heavy program ahead.

Besides its own club races, in which the Dr. R. K. Little cup, G. Pattinson cup, V-8 cup and the Deliveries Ltd. cup, will be competed for, the Coleman Club will also compete in the Western Canada Federation races, in competition with the following clubs: Calgary Homing Club, Lethbridge Homing Society, Drumheller Homing Club, Cranbrook Homing Society and Kimberley.

It is worthy of mention that both the Federation races last year were won by Coleman birds, F. Eyzacker winning the 500-mile race, and C. Makin the 650-mile race.—F.B.

Don McNeil Writes From Oklahoma

Former Liberal Candidate of 1935. Comments on Social Credit in Alberta.

The article printed in this issue—"To Those Workers in the Dark," was sent by the above gentleman, who has kindly remembrances of days he spent in the mining towns of the Pass. He now lives in Tulsa, Oklahoma, having established an office under the firm name of MacNeil Exploration.

Referring to his political adventure here as Liberal candidate in 1935, and his views on the present set-up, he states, in part:

"The people of Alberta have watched the pastboard house of Social Credit topple miserably to the ground. It is conceivable that some people can live through the current administrative period without feeling much of anything but disappointment for the feeble efforts of their representatives; but there are other people who are forced into dispiritedness by the bungling moves of those in power.

Even in good times the work of the miner is not easy; but when real hard times force him to spend most of his days in idleness, as has been the case over the past few years in many of our coal-mining towns, it is high time that something constructive was done. These are not days to dilly-dally with new theories, our coal miners do not want to be guinea pigs for quick experiments. When Rocky Mountain constituency selects its representative at the next provincial election, I hope that the successful man will have the nerve and the common sense to work primarily for the interests of the good people who put him in office.

Alberta must go ahead, and to do so the guiding hand will not have to resort to mysticism. It is a big province that can derive an adequate revenue from its own given resources; all that is really needed to bring contentment to the people is a representative from each constituency who will see to it that these resources are used to the best advantage. I hope that the day is not too far away when all concerned with the mining industry are living the contented and happy life that under normal and sane conditions should be theirs to enjoy."

L.O.B.A. WHIST DRIVE

The ladies of Crescent Lodge, No. 599, celebrated their 14th anniversary by holding a social evening on Wednesday, May 4th. After the whist drive, about forty members and friends sat down to a delightful supper. Prize winners at whist were, Mrs. H. Turner, first; Mrs. A. Short, second; Mrs. H. Dunlop, consolation. The mystery box was won by Mrs. R. Blower.

Flying Visit by Mayor Davison of Calgary

Forced Landing of Airplane on Sunday Caused Party From Trail to Remain Over Night.

Andy Davison, popular mayor of Calgary, didn't exactly enter Coleman in a civic welcome by the mayor and council. He was welcomed by Joe Spivek, proprietor of Spivek's Grocery, and with a party of six people rode in from the airport on Joe's delivery truck. The first question of Mayor Davison was to ask if there was a mayor here, as he wanted to tell him to get the road to the airport fixed, it is in such bad condition.

The plane, a twin-motored machine owned by Consolidated Mining & Smelting Co. Ltd., left Trail Sunday morning in clear weather, though the air was bumpy. It passed over Coleman at noon, and proceeded eastward. Visibility became so poor further east that the pilot, B. N. Harrop, turned back when over Frank and flying very low, returned to Coleman airport, landing at 12:30. In the plane were his wife; Miss C. M. Clark, of Trail; Mrs. B. Morris and two children, of Roseland, and Mayor Davison.

On landing they made an entrance into the deserted building that was used during the time a relief camp was established to construct the airfield. It was smowing heavily, and while deliberating how to get into communication with town to be brought in, Joe Spivek, who had observed the plane as it passed over town, arrived in his truck. His accommodation was gladly accepted, and most of the passengers occupied the body of the truck, with Mayor Davison swinging his legs over the end. He left on the 2:20 train for Calgary, and Mr. and Mrs. Harrop and Miss Clark were accommodated at the Grand Union, while Mrs. Morris and her two children were the guests of Mr. and Mrs. H. C. McBurney. They were on their way to Edmonton to visit relatives.

The plane resumed its journey at 10 a.m. on Monday.

This is the second forced landing Pilot Harrop has made here. Several years ago, bad weather forced him down in Joe Michalsky's pasture east of town, and the plane was hauled through town to the small emergency field used at the time by forestry planes from High River, and which proved useful in emergencies for other machines grounded by weather conditions.

Self-Denial
Campaign of
Salvation Army

House-to-House Canvass of All Homes in "The Pass" to Collect Funds.

From Monday to Saturday, May 16 to 21, the annual Dominion-wide campaign will be held, and Capt. Hewitt has organized his canvassers in The Pass so that every home will be visited, to secure contributions to this humane work. In Canada during the past year over 3400 prisoners have been received and cared for upon their release, free meals have been given to 174,000 persons, and free beds to over 68,000 sick and homeless men.

The work in this province includes three Evettide homes for aged men and women, a splendidly equipped Grace maternity hospital and rescue home, the Booth children's home and the Edmonton women's receiving home for stranded women and girls. It is hoped a good response will be made during the campaign.

Toronto Star: A local Scot who went to see the Snow White film says that the artist Disney does so badly.

ANNIVERSARY SALE!

Attention is directed to Frank Abousa's sale on the second anniversary of his commencing business in Coleman. It's a real "humdinger" with cash bargains.

"Here you are - if you want a real chew!"

BIG BEN

The PERFECT Chewing Tobacco

A Dwindling Asset

One can imagine the consternation that would be created in Western Canada if it were predicted that the time is coming within the ken of the present generation when the prairies and the foothills of the Rocky Mountains will be denuded of much if not all of its feathered and furred life; when a game bird would be literally a rare avis and when the appearance of a fur-bearing animal would be so uncommon as to occasion a newspaper paragraph.

To many people such a prospect is unthinkable and to all lovers of nature and the great outdoors such a possibility is almost too painful to mention, yet there are evidences that a disaster of this magnitude may not be altogether imaginative.

Such evidence was forthcoming at a recent meeting in Regina, Saskatchewan, under the auspices of the Fish and Game League, when a hundred participants in a contest which called for suggestions for better methods for the conservation of wild life were unanimous on one thing, and that was that there is a noticeable decline this year in the number of migratory birds visiting the province and that this decline has been going on for a number of years.

The evidence was not only applicable to the game birds in which the sportsmen were primarily interested, but extended to the feathered songsters which annually gladden the hearts of residents of every township. It was stated that they, too, are dwindling in numbers and that their disappearance is only a question of time unless the sportsmen and nature lovers arouse themselves to take the necessary steps to prevent a great disaster.

A Practical Idea

While opinion as to the dwindling numbers of the denizens of woods and open prairies was unanimous, methods which might effectively be applied to stem the process of ultimate elimination were many and varied. Among them were proposals that bag limits be reduced, open seasons be shortened, a closed season of one or two years for all wild life, except of the predatory varieties, be imposed, that game laws be more strictly enforced, and others.

But one of the most intriguing and perhaps practical proposals came in the form of a suggestion that provision be made for the establishment of a wild life sanctuary of one section of land in every township, coupled with the advocacy of the use of this square mile of land, enclosed by a single line barbed wire fence, for practical studies in wild life and manifestations of nature by the students of the schools within the township.

Such a suggestion is worthy of some serious consideration, for it gets close to the roots of the problem—the value of education as a means of conserving wild life, the inculcation of love of bird and beast and fish, together with the development of trust in the protective power of Nature which is inherent in all who observe Nature with understanding and learn to admire her ways.

What child, for example, who has watched the skill with which the parent birds skillfully construct their nests and the loving care they expend in hatching and rearing their young would wish to wantonly destroy the fruits of their pleasure and knowledge? What child to whom the mysteries of Nature have been revealed first hand in this manner would wish when he becomes a man, to take life unnecessarily or to butcher in wholesale manner?

A Certain Sequence

Yes, education will do much to preserve, not only for the present generation but for those yet unborn, the magnificent heritage which has been bequeathed to us by Nature. To know and to understand is to admire and to admire is to protect. It is a sequence which is as unalterable as the laws of the Medes and Persians.

Coincident with the establishment of small but invulnerable sanctuaries, restrictive measures might also be applied in connection with campaigns for the slaughter of predatory birds and mammals, such as the crow, the magpie and the gopher.

It is essential, of course, that those species which prey on desirable varieties or which take heavy toll of crops be destroyed, but children should not be encouraged to take part in such campaigns without proper supervision, lest it lead to indiscriminate destruction of good and bad alike.

An illustration of the evil effects of such unrestricted, unsupervised participation in campaigns of this kind on the part of juveniles was recently reported in a large prairie town where a band of youths went out to take crows' nests and nestlings in the belief that they were doing a good work. In the bag that they brought first hand in this manner would be remains of crows and crows' eggs, but it was quite apparent that they had destroyed nests, eggs and young of practically every variety of bird inhabiting the district.

Campaigns of this kind when conducted indiscriminately by young people without proper supervision and by youth who are unable to distinguish between species not only may result in irreparable damage to desirable wild life but tend to develop a lust to kill for the sake of killing, thus perpetuating the antithesis of good sportsmanship.

Famous Barber Dead

Francis Haby, 76, former Kaiser Wilhelm's private barber for 26 years and companion to his imperial master on all his travels, died in London last week. Haby was the man who invented the bayonet-pointed moustache favored by the Kaiser for years before the Great War and adopted by thousands of loyal admirers.

It was once common belief that the moon affected the minds of human beings.

Wheat For Poultry

More wheat is being fed to livestock and poultry in Canada. The preliminary estimate of the wheat crop for the 1937-38 crop season amounts to 18,938,000 bushels, as compared with 15,795,000 bushels in the 1936-37 season. Heavier feeding of wheat in 1938 has occurred in Ontario, Manitoba, Alberta, and British Columbia, with the availability of more wheat from the 1937 crop in these provinces than was the case in 1936.

Seven times the volume of an iceberg above the water is below the water.

An old-fashioned man is one who thinks what he works for and saves it.

Before The Great War

World Was Not Then Enjoying Peace And Stability

Before the outbreak of the World War we must go back a hundred years to the last preceding world war ending at Waterloo. But it is not true, of course, that the world before 1914 was all peace and stability. It is twenty years since the armistice and we have to reckon with Spain and with Japan in China. Go back twenty years behind 1914 and we have to take note of such stable events as the Balkan Wars, a South African war and a Russo-Japanese war. Our own skirmish with Spain in 1898 is minor.

Go back another twenty years from 1894 and we encounter a big Russo-Turkish war, or, by stretching the yardstick a few years, can take in the war between Germany and France in 1870. Go back less than twenty years from 1870 and we must reckon with the greatest of all wars between Waterloo and the Marne—our own Civil War tragedy. How many people in Europe and America were excited over the T-ai-ping war? Some authorities say it cost 20,000,000 lives. But in those days people did not agonize over Chinese slaughters, as we do to-day by telegraph, cable, wireless, camera and news reel.—New York Times.

LAY AWAKE IN AGONY WITH NEURITIS

Kruschen Salts Brought Lasting Relief

Ordinary headaches are bad enough, but they are as nothing compared to the awful pains of neuritis in the head, says this woman. Read how Kruschen completely banished the pain.

"I had neuritis in the head and right arm. I suffered untold agony with my head, and I dare not think what might have happened had it continued. Everybody knows what a headache is like, but it is as nothing compared with the awful pain of neuritis in the head. I spent sleepless nights toiling with pain. I began taking Kruschen Salts, and after some months of treatment I was effected lasting relief."—(Mrs.) L.M. Neuritis, like rheumatism and sciatica, frequently has its roots in intestinal stasis (delay). Undigested food accumulates in the system of harmful waste matter, which leads to the formation of excess uric acid.

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients of Kruschen assist Nature to expel these dissolved crystals through the natural channels.

Exploring The North

English Geologist Spends The Winter At Southampton Island

Thomas H. Manning, English geologist, has arrived at Chesterfield Inlet, 235 miles north of Churchill, Man., from Southampton Island, where he spent the winter in exploration work, making the trip over the ice for scientific supplies.

He will return to the island, 125 miles east of Chesterfield, immediately, and later proceed to Baffin Bay, where he expects to spend two years in exploration work. He will receive further supplies from the R.M.S. Nasopac at Cape Dorset this summer.

Manning was leader of four young English scientists who went into the Canadian Arctic in the summer of 1936.

Letter From Queen Mary

Showed Personal Interest In Coronation Diary Of Toronto Girl

A book, "Coronation Cavalcade," was presented to Miss Jean Black by Dr. Henry F. Munro, superintendent of education for Nova Scotia, in the Royal York hotel, Toronto. With this book came a personal letter from Queen Mary.

Miss Black, fifth form student of Vaughan Road Collegiate, has a 250 page leather bound diary on her trip to the coronation which was read from cover to cover by the Queen Mother.

Students from all over Ontario attended the presentation. Richard Graybill, son of the general manager of the Windsor Daily Star, received the first prize for the boys' coronation diary.

Desert Buses Comfortable

New sleeper buses which span the Syrian Desert from Damascus to Baghdad are not only speedy, but also air conditioned and sandproof. They cover the 600 miles in 15 hours. Three inches of insulation in the walls protect against changes in temperature, which range from zero to 145 degrees above. The stainless walls are also sealed against the whirling sand.

Canada's Wild Flowers

Efforts Are Being Made To Prevent Wanton Destruction Of Plants

From early spring until late autumn, the woods, glens and open spaces of Canada are made beautiful by a succession of wild flowers, more varied and as full of charm as the best gardens can provide. In all this glorious profusion, however, lurks a danger. Unfortunately many of the citizens, particularly of the larger centres of population, never give a thought to the fact that there may all too soon come an end to this great abundance of wild plant life through needless destruction.

The preservation of wild flowers does not mean that no one is allowed to pick a bloom, but it does entail due regard to the future of the plant. It demands a little thought. How is a plant to survive if there are not sufficient flowers left on it to form seed, and how can a plant possibly live if it is torn up by the roots, as is too often the case. Tearing a plant up by the roots to gain a bloom is wanton destruction and means only one thing—the passing of beautiful wild flowers from the Canadian landscape. Some species of wild flowers, such as violets, hepaticas, and others with flower stems rising directly from the roots, may be picked at will, so long as the plant body is not disturbed, but other wild flowers like the trillium, Ontario's floral emblem, should never be gathered freely, and as a matter of fact are best left alone in their natural setting, as the flowers cannot be picked without removing all the foliage on which depends the maturing of the bulbous root for the following season's crop of flowers.

Conspicuous efforts have been made in the various horticultural societies towards the preservation of wild plants. In the past, however, the collection of the native flora, and though much has been done, still more organized work is necessary on the part of all institutions in the Dominion to bring home the fact that wanton destruction of wild flowers will eventually cause the disappearance of the finest specimens of Canadian wild plants. It is a matter of public education, for people do not wantonly destroy beautiful things, far less flowers.

In the United States, no fewer than 23 of the States have passed laws designed to protect wild plants. Those rules do not prevent the picking of wild flowers, but they do penalize the destroyer of roots and plants.

French Defence Measures

Increase In Man Power For All Nation's Armed Forces

Increases in man power for all France's armed forces were ordered by President Edouard Daladier, head of the national defence government now ruling the nation by decree. Armed forces in the colonies also will be strengthened by creating of two new battalions of Senegalese sharpshooters, among the best of colonial troops, and other measures.

In addition to raising the navy's man power, the decree authorizes the navy ministry to begin construction before Dec. 31, 1938, of two battle-ships, one cruiser and seven submarines. It further authorizes a number of smaller auxiliary naval craft, with a total tonnage of 24,000, and five oil tankers.

One part of Daladier's report to president Lebrun said motorization of the remaining foot units of the army would be speeded up, while other called for an increase in the number of acres and miles for the forces in North Africa to permit speedier mobilization.

The number of workers in munitions and other factories attached to the defence ministries also will be increased.

More Expensive Wrapper

Aluminum Foil Expected To Promote Sales Of Butter

And now they're going to wrap butter in aluminum foil wrappers. The new wrappers henceforth will command a premium of 1/2 cent per pound, or seven cents per box, from the Montreal Provision Trades Association, a board of trade branch, it was decided.

Following months of study and consultation with leading dairy authorities, the association concluded Canadian butter would gain greatly in appreciation and intrinsic value if the aluminum wrapper were used. The new wrapper costs twice the cost of the present covering, but it is hoped the premium will induce producers to use the wrapping.

Commercial Traveller—"If a man has an income of two million a year, what is his principle?"

Cynic—"A man with such an income usually has no principle."

The difference between a vertical and a horizontal boxer is ten seconds.

FOR ANY TYPE OF HOUSE

● For inexpensive homes or elaborate mansions, architects and contractors are recommending

GYPROC FIRE PROOF WALL BOARD for interior walls and ceilings. Owners recognize the many advantages of using GYPROC. It is Fire-proof—will not burn. It will not crack, warp or sag. It provides a smooth, seamless surface—perfect for any decoration.

It speeds up building — is economical.

It costs no more than other and inferior materials. G638

Scientific Marvels

Discs Of Paper Saw Wood With High Speed Motors

Motors operating at 30,000 revolutions per minute and cutting wood with paper discs, high speed turbines spouting jets of steam with a velocity of 23,850 miles an hour, model airplanes battling against man-made gales in excess of 80 miles an hour, and precision instruments capable of measuring within a millionth of an inch, were among the scientific marvels on display April 30 at the annual open house of the University of Michigan.

Among the exhibits were the Otto-Langdon internal combustion engine of 1970, a one-cylinder, four-cycle affair, fired not by a spark-plug, but by a flame from a pilot light. Despite its crudity, the apparatus is said to have been the forerunner of the modern automobile.

Canada Well Equipped

Could Build Planes For Britain's Royal Air Force

Canada is well equipped to produce efficient fighting planes, Brig-Gen. Sir William Alexander said at Quebec, as he boarded the Canadian Pacific liner Empress of Australia for the British Isles. Former director of aircraft supplies and productions in England during the war, Sir William said Canada was a "likely place" for Britain to build planes for the Royal Air Force.

Canada is well equipped to produce efficient fighting planes, Brig-Gen. Sir William Alexander said at Quebec, as he boarded the Canadian Pacific liner Empress of Australia for the British Isles. Former director of aircraft supplies and productions in England during the war, Sir William said Canada was a "likely place" for Britain to build planes for the Royal Air Force.

New System For Dentists

Doctor Has Experimented Seven Years With Twilight Sleep

A new "twilight sleep" during which a fellow may have a tooth drilled or pulled without pain and still remain conscious was demonstrated before the New Jersey Dental Society at Atlantic City, N.J.

Dr. James F. Hanegan, of New York, gave the demonstration, using as his patient a boy selected at random. Through careful regulation of nitrous oxide and oxygen a nurse kept the boy numb and impervious to pain, but yet able to carry on conversation with the dentist. Only the nerve "undines" were asleep, the doctor said.

The boy said he experienced no sensation whatever. Dr. Hanegan said no serious mishaps had resulted during seven years of experimentation with the system and he believed it was now developed to a point where all dentists could use it regularly.

Record Is Unique

A record believed unique in aviation annals stands to the credit of Canadian Airways' "Goldfields Express" Norseman. Within less than 10 hours, the machine was flown with skis, wheels and floats on the last trip out from Goldfields.

Venus is nearly twice as far from the sun as Mercury, and is almost the same size as the earth.

NEW FIRESTONE

Low PRICED Standard Tire

Here is the tire sensation of 1938. New in design, new in appearance, with a new high in Firestone quality at a new low price.

This new Firestone Standard Tire has everything you want—safety, mileage, carefree dependability.

Never before have you seen so much tire for the money. Every tire carries the Firestone name and guarantee—your assurance of greater non-skid efficiency, greater safety and longer mileage.

Before you buy any tire this Spring, first go to your nearest Firestone Dealer and see how he can save you money with this new Firestone Standard—the greatest tire value ever offered at these low prices.

Free Hand For Hitler Is Reported Bargain Of Dictators

Hitler—A bargain to divide Central Europe and the Balkans into Italo-German spheres of influence appeared to be the major outcome of German Chancellor Hitler's visit to Italy.

The Associated Press said this was indicated strongly by high Fascist quarters as the Führer spent his final day here watching the Italian air force display its might.

King Vittorio Emanuele and Premier Mussolini accompanied their guest to the Tyrrhenian coast where two 23,000-ton condemned merchantmen were sunk off Fubara and tons of bombs were dropped in a mock battle in which 400 planes took part.

A few miles away, Santa Marinella, a valley was torn to pieces in a thrilling display of military strength—a mock infantry battle in which live shells and machine gun bullets flew over the heads of Fascist troops.

The displays followed Saturday's reaffirmation of the strength of the Rome-Berlin axis and friendship between the two dictators and their countries.

Hitler, at a brilliant banquet in the Palazzo Venezia, gave a solemn promise renouncing "forever and ever" any claim to the Italian South Tyrol, where a large German minority resides.

He declared: "It is my unshakable will that the frontiers of the Alps, drawn by nature between us, shall remain inviolable for all time."

Premier Mussolini in turn hailed the spirit of Franco as indispensable and warned that it was opposed to "disintegrating" forces in Europe. Throughout the speeches ran the

theme that the two great nations were inseparable as blocs of "order and healthy progress" in a world of "trouble and decomposition."

The warplane manoeuvres rounded out the exhibition of Italy's armed might for the Führer.

High Fascist quarters made it clear Italy's Easter agreement with Great Britain did not weaken the Italo-German working agreement.

Hitler was said to have a free hand in Czechoslovakia, as far as Italy is concerned, and in return he promised to respect Italian interests in the Danubian and Balkan regions.

The contents of their bargain gradually were being disclosed, some members of the German delegation described Hitler's solemn guarantee of the present frontier between Germany and Italy as "a colossal sacrifice."

This renunciation of the South Tyrol—the region where many Germans live and which Italy got as part of the Great War settlement—the Germans said they could explain only on grounds Mussolini's reported assurances of a free hand for Hitler in Czechoslovakia must have been far-reaching.

These Germans—minor members of the German delegation—indicated they hoped against hope until Hitler rose to speak that Mussolini might yet cede the German-speaking portion of South Tyrol.

"I only hope there won't be many suicides in South Tyrol," one observed. "The propaganda since Anschluss (union of Austria and Germany effected March 13) has been terrific against the Italian Tyroleans, much against the wishes of the German government."

Miss Whitton, executive director of the Canadian Welfare Council, Ottawa, speaking on a Romanian resolution proposing creation of special neutral zones for children, argued that if it were possible to create such zones they could be given more universal application.

The Spanish government representative questioned whether such zones are feasible. In Spain, he said, the government found it necessary to camouflage hospitals and refugee camps to protect them from air bombardment. No action was taken on the resolution.

Mr. Hore-Bellisha said his aim was to train them "in various tasks so that on mobilization women could supply military requirements for various non-combatant duties."

The announcement recalled the situation during the Great War when 1,000,000 women made munitions, more than 100,000 served as nurses and many thousands more "did their bit" with the Women's Auxiliary Corps and the Women's Royal Naval services in non-fighting work.

Air Pilot Regulations

New Stringent Regulations To Come Into Effect July 1st

Ottawa.—The civil aviation branch of the transport department announced new stringent regulations, effective July 1, regarding issue of transport pilot licenses.

The minimum age limit for a pilot receiving a license was raised from 19 to 23 years. The maximum age remained at 45. At present an applicant must submit proof of at least 250 hours in the air as pilot in sole charge of an aircraft. Under the new regulations this was raised to 500 hours.

In the clause dealing with test of endurance the pilot will be set up 6,000 feet higher than at present, bringing the altitude to 12,000 feet. At this height he must remain for one hour.

In the night flight test the present regulation is to remain in the air for 30 minutes above the ground or water at 1,500 feet. The new regulation will require a pilot to execute three flights of at least 15 minutes each at the same altitude.

To the regulation governing spins has been added the words "without exterior view." This regulation requires the pilot to satisfy the examining officer as to his ability to recover from both left- and right-hand spins.

J. A. Wilson, controller of civil aviation, has sent copies of the new regulations to all flying clubs and schools, pilots, inspectors and stations and aircraft owners.

These Germans—minor members of the German delegation—indicated they hoped against hope until Hitler rose to speak that Mussolini might yet cede the German-speaking portion of South Tyrol.

Release Political Prisoners

General Amnesty In Eire Seen As A Peace Gesture

Dublin.—The government of Eire in a peace gesture on the election of Dr. Douglas Hyde as president, ordered the release of six prominent political prisoners. The release amounted to a general amnesty to Republicans since only six were in jail throughout the country.

Those released were Michael Conway, Clonmel; Martin O'Donnell, Drumcondra; Dublin; Martin Murray, County Clare; John Hartnett, County Cork; Thomas Grogan, Drogheda; John Fitzsimmons, Dublin.

Dr. Hyde, a Protestant, was elected to head the predominantly Catholic state for a seven-year term at a ceremony attended by representatives of all Eire's political parties.

The distinguished Gaelic scholar, once attached to the faculty of University of New Brunswick, Fredericton, N.B., will take office June 1.

Meanwhile Finance Minister Sean MacEntee announced the government would float a loan shortly to finance part of £100,000,000 (\$500,000,000) payment to Great Britain under terms of the new Anglo-Eire agreement. The amount of the loan was not specified.

Convention Date Set

Western Stock Growers' Association Meets At Calgary In June

Calgary.—Plans for the 42nd annual convention of the Western Stock Growers' Association to be held here June 2 and 3, are near completion.

Alberta's proposed production tax, designed to replace certain land taxes, will be a major subject for discussion. Hon. Lucien Maynard, provincial minister of municipal affairs, has been invited to address the stock growers on the new taxation plan.

Hon. D. B. Mullen, minister of agriculture, and Hon. N. E. Tanner, minister of lands and mines, will also address the delegates during the two-day convention. Another speaker will be George Spence of Regina, head of the Prairie Farm Rehabilitation Act administration.

Hon. D. B. Mullen, minister of agriculture, and Hon. N. E. Tanner, minister of lands and mines, will also address the delegates during the two-day convention. Another speaker will be George Spence of Regina, head of the Prairie Farm Rehabilitation Act administration.

Peaceful Solution Of Czech Problem Hope Of Britain And France

London.—Great Britain and France decided to make a quick effort to ease Czechoslovakia's minority trouble.

Informed sources said that, without waiting for Adolf Hitler's return from his state visit to Italy, Sir Neville Henderson, British ambassador to Germany, would see Field Marshal Hermann Goerring, acting chancellor, in Berlin on behalf of Britain and France.

The Anglo-French approach would include:

1. A request for German aid in getting Konrad Henlein, Nazi leader in Czechoslovakia, to moderate his demands for that nation's minority of 3,500,000 Germans.

2. An Anglo-French effort to advise the Czechoslovak government to make liberal concessions.

3. A warning "rough handling" of the minority issue by Germany must certainly would precipitate conflict.

Henlein, April 24, submitted an eight-point program in which he called for revision of Czechoslovakia's foreign policy, self-government with Nazi principles for the German minority and other concessions.

The Berlin move was seen as the vital one since a peaceful solution of the Czechoslovak problem was felt to depend upon Germany's acceptance of a Henlein settlement within the Czechoslovak constitutional framework.

In Rome Mussolini was represented as having promised Hitler to bring all diplomatic pressure possible upon Prague both to grant Henlein's demands and to loosen, if not sever, the Czechoslovak alliance with Soviet Russia.

The consuls will decide whether the registered persons are liable to be drafted. Naturalized Canadians are not affected. The announcement also said that German nationals who are not less than 17 years and more than 25 years of age may voluntarily serve in the German army from Oct. 15, 1939.

Ottawa Stages Debate On The Tariff On Farm Implements

Ottawa.—Liberals and Conservatives got into a good, old-fashioned scrap in the House of Commons on a familiar battleground—tariffs. The farm implement industry was the object of their conflicting arguments.

Two Liberals, W. G. Weir (Macdonald) and Robert Deachman (North Huron), suggested eliminating the tariff of 7½ per cent, paid by foreign farm implements entering Canada. Two Conservatives, Denton Massey (Toronto-Greenwood) and Mark Senn (Haldimand), advocated retaining the duty.

The debate arose on a motion to adopt a committee report tabled last session after an investigation of the farm implement industry. The most important feature of the report was a protest over increased machine prices.

The tariff on implements was valued at 25 per cent, by the Bennett government. The Canadian-American treaty, signed Nov. 11, 1935, reduced it to 10 per cent, and the budget of 1936 dropped it to 7½ per cent.

Mr. Massey said if the duty was removed and the selling costs of implements dropped accordingly, and if farmers purchased only imported machines, the saving to the average western farmer on a half section of land would be \$3.68 a year.

He suggested this saving was out of all proportion to the loss that would be suffered by industrial workers. Not only those in the implement business but in secondary industries as well. Elimination of the duty would throw thousands of men out of work, while the saving to the farmers would represent less than one-fifth of a cent in the cost of wheat.

If the Canadian market could be secured entirely for Canadian manufacturers it would result in lower costs to the farmers because of the increase in volume, argued Mr. Senn. At the same time it would provide an increase in employment, not only in the implement industry but in others dependent on it.

The farm implement industry was monopolistic in nature, countered Mr. Weir. The evidence of the committee showed "the companies work in close harmony. I am not going to say a combine exists, but I think it is safe to say there is a close co-operation between the companies with respect to general policy."

Because the nature of the industry was monopolistic, there should be the fullest possible competition factors, Mr. Weir contended, and for that reason the duty should be removed.

Agriculture was Canada's basic and most important industry, Mr. Deachman claimed. Farmers had to take their chances economically and so should industry, not protected behind special privileges.

Mr. Massey described a recent address by Hon. J. G. Gardiner, agriculture minister, in this debate as "the most provocative of any heard this session from a responsible minister of the crown, which could do nothing other than generate heat rather than light."

Such utterances were designed to "strike additional blows at the wheelmen being driven between various groups of the peoples of Canada."

Mr. Massey said he would repeat what he had said many times before, that "neither myself nor my family have any interest whatever in the Massey-Harris Company." But he was interested in and concerned about the welfare of those in that and all industries.

"For years the implement industry has borne the brunt of vicious attacks in this chamber and from clasp politicians outside the house. What about all the other industries supplying the farming industry with its necessities?"

Mr. Massey accused Mr. Gardiner of making false and misleading statements when he spoke earlier in the debate. For instance, he quoted the minister as saying implement companies made 20, 30 and 40 per cent profit while the fact was the leading company had lost money over the past 20 years.

If the tariff was removed and American machines came in, they would be no servicing of parts, Mr. Massey predicted.

During the period 1931 to 1935 those employed and industry itself got more than they got for their efforts in 1925, Mr. Deachman told the house. In terms of purchasing power adjusted to changed living costs they had got more than in the peak year, but the farming industry, during the five-year period, had suffered a \$2,000,000,000 shrinkage in its revenues.

When such conditions existed it was impossible to prevent disunity, Mr. Deachman said. It was apparent the member for Greenwood thought more of the interest of the 4150 people engaged in farm implement making.

No Provinces Consulted

Before Investigation Into Dominion-Provincial Relations Was Started

Ottawa.—The Dominion government did not consult any provinces before deciding to appoint a royal commission to investigate Dominion-provincial relations, Prime Minister Mackenzie King told the House of Commons.

He was replying to A. M. Young (Lib., Saskatoon), who referred to Premier Hepburn's statement in Toronto before the Rowell commission, that he suspected some provinces were consulted before the commission was established.

Mr. Hore-Bellisha said his aim was to train them "in various tasks so that on mobilization women could supply military requirements for various non-combatant duties."

The announcement recalled the situation during the Great War when 1,000,000 women made munitions, more than 100,000 served as nurses and many thousands more "did their bit" with the Women's Auxiliary Corps and the Women's Royal Naval services in non-fighting work.

Army Of Women

British Secretary For War Would Have Them Mobilized

London.—Leslie Hore-Bellisha, secretary for war, announced he would raise an "army" of women as part of the military machine he is rebuilding.

Having set new records for recruiting men, the dynamic minister said there was no reason why women should not serve in non-combatant capacities. He called a conference of women leaders at the war office to discuss how women could be drilled to assist in time of war.

Mr. Hore-Bellisha said his aim was to train them "in various tasks so that on mobilization women could supply military requirements for various non-combatant duties."

NOTES AND COMMENTS

WHILE spring cleaning, records of several years were uncovered in The Journal office. They included minutes and financial statements of various organizations in which the writer had taken a part during the last ten years, and all were consigned to the flames as being dead issues, though some of the benefits, accruing to the community from these activities, remain. The thought occurred that the work in these records represented hours and hours of voluntary work, and that it usually falls on just a few while others less active enjoy the benefits. What Coleman needs now is a new group of active voluntary workers for community benefits. Will a service club fill the bill? Something is needed and energetic leadership could accomplish much.

A SERVICE CLUB would be a fine thing for Coleman. Rotary International, Kiwanis, and latest of all The Lions, have had their advocates here endeavoring to arouse interest with the view of organizing. None have succeeded, because there are too few of the business men who have a favorable attitude towards service clubs. Not for any particular reason, but just because they are indifferent to the benefits which the functioning of a service club bring to a community.

CAST YOUR eyes around and you'll find that towns in which a service club or clubs are established invariably carry an air of energy, enterprise and progress. It is because business men meet once a week and plan community activities in which everyone benefits, and life is made just a little more interesting and more worth living. After all, a live town is that way because it has live business men; and it is dead when each goes his own way and cares not if the other fellow sinks or swims. Undoubtedly there is scope here for a club. Some drones take no part whatever in civic or community affairs; yet if they were to be shown, through the functioning of a service club, what joy they would get out of doing something more than standing behind a counter, they would probably become just as energetic as their more progressive and go-ahead fellow citizens.

THE MAN who lives for self alone, who carries on his business on that

basis, lives a very cut and dried existence. It is not really living. To get something out of life, some real joy, you must put something into it. You cannot raise beautiful flowers in a garden unless you sow good seeds. You cannot live a happy and useful life unless part of your time is spent in helping others. That is the prime object in a community of a service club, and the sooner Coleman has one, the better for it in many ways.

SURELY it would be a good idea if Coleman and Blairmore would get together and clean up the Lake Park, and not allow it to be a dumping ground for any old thing. So writes a correspondent whose name is not affixed to the letter, but who signs: "Tours, a Lover of Natural Beauty."

MANY will agree. At Banff, the Dominion Parks Board is making a clean-up by ordering demolished shacks and cabins which are eyesores. Some years ago efforts were made to have Crown's Nest Lake included in the provincial parks scheme, whereby it would have been subject to well-defined building regulations in keeping with the natural surroundings. Instead, permission has been granted to erect any old clap-board shack squatter may have found cheapest and cheapest to erect. The result is that many tourists pass it by as uninviting.

The opening of Creston's \$25,000 post-office building makes Coleman people wish the Federal government would do likewise in Coleman. What's the good of wishing? More political "pull" is the lever to bring results.

THE main reason Coleman was given an emergency landing field which cost nearly \$100,000 was because a few people interested themselves in securing the attention of officials of the Department of Civil Aviation. Public works or buildings do not come to a place by keeping quiet.

ODDITIES IN THE ADS

The Calgary Herald stated there must be some odd animals in Alberta, after reading in last week's Journal in the classified ads that "a man was wanted to take care of horses that can speak German." It just goes to show that classified ads have a human interest appeal. As a matter of fact, there were two applicants for the job. They thought it was Sam Sagoff, who was the owner of the horses. Sam says his horses understand Russian better than German.

MAKING CANADA

A BETTER PLACE IN WHICH TO LIVE AND WORK

A Series of Letters from Distinguished Canadians on Vital Problems Affecting the Future Welfare of Canada

Specially Written for Canadian Weekly Newspapers Association

W. SHERWOOD FOX
London, Canada,
March 14, 1938.

Dear Mr. Editor
As a believer in the exceptional power of the weekly press to guide public thought I cannot but commend your special effort to assemble constructive views concerning the great public issues of Canada. Though I dare not count my own views as of any worth, yet I venture to submit one or two of them if for no other reasons than that you have requested them and that I hold them very strongly.

It seems to me that the many internal issues that confront us now are really only so many phases of one great issue—essentially a great moral issue. Most of our troubles appear to be due to the inability of Canada as a group to see national conditions as they are. This is nothing less than a refusal to face facts, a shortcoming the right name of which is a very unlovely one—intellectual dishonesty. However sanely we conduct our private lives and our private business, we are in the habit

of assuming an attitude of wishful thinking in regard to our public problems. We act as though unpleasant problems will solve themselves if we only close our eyes to their existence long enough. We seem to assume that by merely wishing things to be otherwise, we can improve them or remove them. In the meantime the plain fact is that our problems are steadily growing worse—public debts mounting, railway deficits nearing their absolute limit, government expenses increasing through the demands of ourselves, the people, who blindly ask to be bribed by our own money.

Another form of this self-inflicted blindness is playing the old game of "passing the buck." Canada is a democracy and, therefore, we, the people, are fundamentally the government. Our representatives do the chores of government for us, but we are responsible for the kind of people they are and the way in which they do their chores. In practice, however, we lay the blame of bad or indifferent government upon them and arrogate to ourselves credit for any bits of good government. We are also in the habit of endeavoring to make influences originating outside the country the scapegoat for many of our own sins.

I believe that the weekly press can do Canada no better service than, even at the risk of becoming boring through repetition, by constantly reminding Canadians that most of their national troubles are of their own making and hence of their own curing; that the day of reckoning is absolutely unavoidable; that if we face the facts in our public business as we do in our private business, there is yet time to solve a large number of our problems and reduce or even avoid the impact of calamity. Many other nations sincerely profess to admire Canadians for their common sense. Let us endeavor to show ourselves genuinely worthy of the praise.

Sincerely yours,

W. SHERWOOD FOX,
President and Vice-Chancellor,
University of Western Ontario,
London, Canada.

How Does Life Insurance Benefit Living Policyholders?

Answer.—It enables policyholders to build a substantial cash reserve for future needs—and at the same time ensure protection for their families.

Question.—How does Life Insurance ensure funds for retirement?

Answer.—When the need of protection is passed, the proceeds of a policy may be used to provide a guaranteed monthly income.

Q.—What percentage of Life Insurance payments are made to living policyholders?

A.—Approximately 75 per cent.

Q.—How is the balance of these payments made?

A.—In death benefits to the beneficiaries of policyholders.

Q.—How much money does Life Insurance distribute each year to living policyholders in Canada?

A.—More than \$100,000,000 a year.

This is the sixth of a series of messages sponsored by Life Insurance Companies operating in Canada. The seventh, to appear in two weeks' time, will show how Life Insurance savings finance mortgage loans.

SALE OF LANDS TOWN OF COLEMAN

Notice is hereby given, under the provisions of the Tax Recovery Act, 1929, the Town of Coleman will offer for sale, by public auction, on Friday, the 10th day of June, 1938, at 10 o'clock in the forenoon, at the Town Hall in Coleman, Alberta, the following lands:

Block	Plan
3	881 DK
4	820 L

Each parcel will be offered for sale subject to the approval of the Minister of Municipal Affairs, and subject to a reserve bid and to the reservations contained in the existing certificates of title.

Terms, cash.

Redemption may be effected by payment of all arrears of taxes and costs, at any time prior to the sale.

Dated at Coleman, Alberta, this 23rd day of April, 1938.

JAMES BORD, Secretary-Treasurer.

STELLAR SHOWS FOR WEEK END AT PASS THEATRES

Broadway's sensational stage success "Stage Door" is the big feature for Saturday and Monday at the Palace, and at Cole's theatre, Bellevue, and a matinee in the afternoon.

The Palace double feature nights continue in popularity and they will be shown on Tuesday to Friday nights inclusive.

CONSUMERS BENEFIT BY LOWER COSTS

On the basis of 1937 quantity consumption, users of petroleum products on the prairies will save \$5,500,000 this year by reason of reductions in prices of light petroleum products since the Turner Valley was established as an important oil field.

If good crops favor the west, there would be even a larger saving incident to larger consumption of products. The saving is even more substantial when one considers that the history of an oil field in the making is frequently one of costly disturbance. Adequate transportation facilities have to be provided. Other sources of supply have to be displaced. For instance, a few years ago when the Texas oil field was being developed, there was a ruinous disorder. An important natural resource was wasted. Investors lost heavily and all interests suffered.

In striking contrast to such experiences have been developments in the Turner Valley. Co-operation of producers, pipe lines, railways, and refineries, has resulted in an orderly development. Both producers, and to a greater extent consumers, have reaped the benefit. Producers have benefited by a price for crude oil which has been adequate to encourage a steady development of the field. Consumers have benefited by substantially lower prices for petroleum products.

Better for Sticking

Carter Glass was talking to a business man, when the latter said, "We don't hear so much these days about an elastic currency, do we?" "No," replied Mr. Glass, "the cry today seems to be for a more adhesive currency."

The Ladies' Aid of St. Paul's United church will hold their anniversary supper in the church club room on MONDAY, MAY 15, from 5 to 6.30.

FIGURES IN A BOOK?

What gives rise to a loan?

★ ★

"Credit can only be loaned against real assets... The amount of credit must always be limited to the amount of free money..."

That was written by one of the greatest of Socialists—by the late Viscount Snowden of Icknashaw, Philip Snowden, in 1935—little more than two years ago.

Few stood so long or so resolutely in the forefront of public controversy, or aroused such fierce opposition by vigour of opinion or severity of tongue—and none passed to his rest having earned greater public respect than Viscount Snowden.

His career was a triumph of sturdy British character. He took an unpopular course during the Great War, but later became one of his country's great figures, standing firmly for his convictions and for soundness in the financial structure of Great Britain.

His words quoted above apply to Canadian banking today with all the force with which he applied them that day to banking in England. The Canadian banking system is a British system, adjusted from time to time to fit the needs of a developing nation in the changing scene of this new world.

Credit can only be issued against real assets. That is as true today as ever. You cannot create credit by writing figures in a book. You cannot make loans regardless of deposits, collateral or repayment, then write the loans up with a fountain pen as figures in a book labelled "Deposits" and lend them over and over.

If you could, then bankers in any country would need no more than a fountain pen to prevent bank failures.

During the last ten fiscal years Canada's chartered banks have paid more than \$397,000,000 in interest on deposits. If they could create deposits by the magic process of writing figures in a book, they could have saved that \$397,000,000!

And if banks could lend ten times the amount of their deposits, collecting interest each time, bank profits would become a national scandal, dividends would be paid in astronomical figures, people would be selling all they had to buy bank shares, and there would be a land office rush on at Ottawa for bank charters.

But what are the facts?

Bank profits last year averaged less than half of one per cent. on total assets—a lower margin than that of any other class of business, corporate or individual.

Dividends are less than 4 1/2 per cent. on shareholders' investment; nobody is scrambling to sell all he owns to invest in bank shares, and there is no land office rush at Ottawa for bank charters—though no application has been refused in the last fifteen years.

Banks perform no miracles.

They keep cash reserves more than sufficient to meet the average daily withdrawals. They keep much more in forms readily convertible into cash, should any emergency ever arise.

By reason of their strong liquid position Canada's chartered banks have money awaiting demand—just awaiting safe loaning opportunity.

Banks cannot lend money unless people want to borrow it. They have no monopoly of the business of extending credit, for the cash reserves of many other corporations find a useful earning outlet in the same way.

Some loans directly give rise to deposits; but have you ever considered what it is that gives rise to a loan? A man's realizable assets accumulated from his own work, plus his own character, ability and willingness to repay.

All deposits are not the direct result of loans. People do not borrow money and pay interest on it to leave it on deposit at a lower rate or no rate at all.

They borrow money for use. They draw it out promptly and use it in the expectation of making a profit over and above the bank charges.

Let us remind you that deposits of any kind are always payable to the depositor, or to his order, in cash.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions from the standpoint of his own experience. The article in this series will appear in this newspaper. Watch for it.

Local News

Mr. and Mrs. S. B. Ryan were visitors to Kimberley last week.

A son was born to Mr. and Mrs. J. Price on April 29. His name is John Charles.

Mrs. Arthur E. Graham returned recently from a two weeks visit to Vancouver.

Ken Blain, of Kimberley, was down for the week end, at the home of Mr. and Mrs. H. Nash.

Will Victoria Horejka please call at The Journal office, where she will receive her arithmetic book.

Services at St. Alban's church are being read by George McMullen during the interval till the new minister arrives.

Most people are kind to animals. Last week a little Boston bull pup was killed by an automobile, and it was surprising the sympathy it aroused.

Mrs. Robert Holmes left on Friday to attend the annual provincial assembly of the L.O.R.A. being held in the L.O.O.P. hall in Edmonton during the week, representing Coleman lodge.

Freda Antrobus was first place in the piano class for those under 20 years at the musical festival at Nelson, an achievement for which she

is to be heartily congratulated and commended.

Ten per cent saved on your tax bill is a good inducement to pay before June 15. Notices were mailed last Friday. You cannot earn money any easier than by taking advantage of the discount.

Boys and Girls! Show your ability in writing newsy paragraphs for The Journal. For the two best local news items in next week's issue 50c each will be awarded. Items must be typewritten or in legible handwriting.

Coleman high school students have issued neatly printed invitations to a party to be held in the Community hall on Friday, May 20. David Jones, energetic president of the students' club, has the assistance of a live committee.

The Journal office takes pride in turning out THE BEST in all kinds of printed stationery. Invitations, commercial or private stationery, posters, bear the imprint of skilled workmanship. Attractive printed matter gives prestige to any business concern.

It is good practice for any boy or girl to try writing newsy paragraphs for The Journal. Many a good newspaper writer started in this way. Observe the many things of local interest; write a paragraph and send it to The Journal. It will interest your

friends and you'll enjoy seeing it in print.

Journal workers are citizens whose homes are in Coleman; who are part of the community. Remember that the money spent in printing orders and advertising goes back into local retail channels, and promotes customers' goodwill and increased business. Journal employees take pride in their work and are interested in community progress. Your local newspaper is a community asset.

Humorist: To play polo with a fashionable club, we are told, one must be prepared to spend as much as £2,000 a year. We have decided to stick to croquet.

North American Newspaper Alliance Inc. (c): A condition has arisen through Middle Europe whereby a fellow must keep the radio going 24 hours a day to know what nationality he is.

Punch (c): A writer of Spring-cleaning Notes points out that the appearance of strange lumps after papering a wall is probably a sign that the paste was too thick. Or, again, that you omitted to take down the pictures first.

Los Angeles Times: There may be no further point in buying a bound atlas, as Europe is now definitely a loose-leaf proposition.

WORLD HAPPENINGS
BRIEFLY TOLD

The United States Senate approved the Roosevelt administration's \$1,150,000,000 naval expansion bill.

Great Britain now is ready to mobilize all vehicles at a moment's notice to meet an "extraordinary circumstance" that may arise, the ministry of transport announced.

Administration of the \$25,000 fund obtained by the Canadian Legion to assist distressed former members of the Imperial Forces has been undertaken by the Canadian Red Cross.

A world jamboree of boy scouts is to be held in Wellington, N.Z., in 1940. It is expected some 5,000 scouts will be in camp near the capital for the occasion.

Col. Charles Lindbergh and his family will leave their Kent house in June for the island of Illice, off the French coast, which Lindbergh recently purchased.

All trade advantages given to the United Kingdom in the Elre market under the recent agreement are also extended to Canada, according to text of the "agreement with the United Kingdom."

Sentimental Atlantic travellers have been stripping the Leviathan, which is at Glasgow for breakup, one man paying \$1.143 for the famous "11th hole" cocktail bar, to be re-erected in his home.

Prizes in a Dominion-wide musical competition sponsored by the Canadian Performing Rights Society were presented by Governor-General Lord Tweedsmuir. A \$700 musical scholarship was presented to Eldon D. Rutherford of Saint John.

Prime Minister Joseph Lyons has announced preliminary Anglo-Australian air mail service by flying-boat, beginning in July with a twice-weekly service in both directions, will be increased to three times weekly both ways by August.

Nova Scotia's board of censors examined approximately 3,500,000 feet—or 1,040 miles—of film in 1936-37, and not a single picture was condemned, according to statistics issued by Chairman C. H. Bennett of the board.

Sailed For Uruguay

Eight Stowaways On Greek Ship Get Free Passage

"Stowaway found in the hold, Sir," shouted a seaman to Captain Mantovinos, master of the Greek steamship Andrea, nearing Dover.

Captain Mantovinos was not pleased as he had a crew of 32, with neither extra food nor accommodation aboard the 6,500-ton vessel for its 32-day trip from Antwerp to Montevideo, Uruguay.

That stowaway was a Lithuanian. "Better search the ship," said Mantovinos, and one by one the crew uncovered a Frenchman, a Chilean, a Russian, an Italian, another Lithuanian, a Greek and a Portuguese, not one of whom knew of the others.

Captain Mantovinos became extremely displeased. Besides there was no common language for all, nor interpreters for them. The skipper went with his eight new friends to the immigration offices in Dover, appealing to the authorities to "take them off my hands," but England did not want them.

The captain and the eight stowaways boarded the Andrea and sailed for Montevideo.

Historical Treasures

At Windsor the king personally showed Premier Edouard Daladier a number of his historical treasures. One had poignant appeal for the Frenchman. It was the original of Napoleon's letter to the prince regent of England when, after his defeat at Waterloo, Napoleon threw himself "like a thunderbolt" on the mercy of his most generous enemy.

A new popgun has been invented for shooting the house fly. We are waiting for the supreme sportsman who will try it on a mosquito.

Was Great Sculptor

George Barnard Died In New York After Short Illness

George Barnard, 74, who spent a lifetime recapturing the spirit of the renaissance in a modern age and whose statues grace the great galleries of the world, died recently in hospital at New York.

He was stricken while working on what was to have become a gigantic statue of Abel, depicting him as he realized the treachery of Cain.

The "Modern Michelangelo," whose marble figures grace the great galleries of the world, also left an incomplete life's masterpiece—The Rainbow Arch, a monument to democracy.

Barnard, who worked 15 years and spent \$200,000 to prepare a 100-foot in plaster 400 heroic statues for the frieze.

The sculptor, subject of many art controversies, turned to the renaissance for his inspiration. His work was classic, huge but as simple as the life he himself led.

Among his most notable works were "The God Pan," now on the campus at Columbia University; "Brotherly Love," which is in Norway; statue of Abraham Lincoln, which was sent to Manchester, England, to commemorate 100 years of peace between the United States and Great Britain; and a group of 33 marble statues at the Pennsylvania state capital in Harrisburg.

TESTED RECIPES

By Katharine Baker

KEEPING FRIEND HUSBAND AWAKE

If you don't want a sleepy husband for an evening companion, what you feed him when he comes from work. Many wives who suffer from dull evenings at home with their husbands drawing in their arm chairs until bed time, would get out to more show and parties if they planned light, satisfying supper.

Your man has probably had a good, substantial lunch down-town, and there is no necessity to feed him into an evening stupor with a heavy dinner.

Here are a group of satisfying and appetizing supper menus which will keep your husband alert, bright, and playful as he is in the pre-marriage days. And they are simple to prepare and will leave the wife fresher for an evening's outing.

1. Indian Relish Supper Plate

Hot Rolls
Coke
1 package lemon flavoured jelly powder
1 pint warm water
1½ cups cabbage, finely chopped
½ cup Indian Relish

Dissolve jelly powder in warm water. Add salt to cabbage. When jelly is slightly thickened, fold in cabbage and Indian Relish. Turn into individual molds. Chill until firm. Makes eight molds.

2. Salami and Pickle Combination Plate

Coffee
Apple Sauce
Cookies

Salami and Pickle Combination Plate
1 package lemon flavoured jelly powder
1 pint warm water
1 tablespoon vinegar
½ teaspoon salt
½ cup cabbage, finely chopped
½ cup sour pickles, finely chopped
1 tablespoon red pepper or pimiento, finely diced
1 teaspoon prepared horseradish
Dissolve jelly powder in warm water. Add vinegar. Chill. Add salt to cabbage. When jelly is slightly thickened, fold in cabbage, pickles, red pepper and horseradish. Turn into individual molds. Chill until firm. Makes eight molds. Prepare supper plate of thin slices of salami, firm bread and butter sandwiches, and jelly salad unmolded on crisp lettuce.

Stuck To His Story

"Then you admit that you struck the plaintiff with nails, as you thought?" demanded counsel of the man charged with assault.

"You can't mix me up like that," replied the defendant, indignantly. "I've told you twice I hit him with a brick. There wasn't no nails nor nothing of the kind about it—just a plain brick like any gentleman would use."

NEW SLIMMING JACKET-FROCK

By Anne Adams

New gaily—new ideas for the ever-popular "jacket-frock" were the but in this clever Anne Adams pattern would you see such slimming flattery and subtlety of line and detail? You'll be dressed for every occasion, when you don this ensemble for "neath its trim jacket is the smartest, simplest frock of the season! Daintily bows and accent its V-neckline, while soft sleeves and a chic, chic skirt sum up the rest of it. And making this frock is the most delightful "job" you ever undertook. Lovely in soft triple stretch Pattern 4731 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 dress and jacket takes 5½ yards 30 inch fabric and ¾ yard lace edging. Illustrated step-by-step sewing instructions included. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 115 McDermott Ave. E., Winnipeg.

Gives Warning

Buy From Your Own Seedsmen And Be Safe!

A few unreliable people in The Netherlands (Holland) are trying, under various assumed names, to advertise flower bulbs in Canadian papers.

These advertisements are not paid for. Cheques sent in payment have proven spurious.

Moreover, those who, acting upon the advertisement, remit money to the advertiser, will not receive any bulbs.

I therefore beg to suggest that you consult me, before publishing any advertisement of Netherlands bulb exporters. Consul General The Netherlands, Room 1100 Castle Building, 1401 Stanley Street, Montreal.

Yields in the wheat growing states of Australia have exceeded estimates and the grade is higher.

Tornadoes are the result of the running together of air masses of widely varying temperatures.

Two famous Canadian naturalists, Jack Miner and Grey Owl, visiting with Mourning Doves

HOW UNCERTAIN IS LIFE

Only a few weeks ago this photo was taken at Jack Miner's home near Kingsville, Ontario, who Grey Owl visited him. Now Grey Owl is dead. There is a great controversy over whether he was an Englishman or not. The point seems settled in the affirmative by the fact that his grave stone has the names "A. Belaney" and "Grey Owl" both on it.

Jack Miner at 73 carries on in his great work of bird conservation though one of his greatest regrets is that age will not permit his travels or lectures to his friends in the West any more, although we saw hundreds of written requests for his visits from all over Canada and the United States.

Air Raid Protection

Newspaper Firms In London Take Precautions To Protect Staffs

In view of the activity in connection with air-raid precautions work in recent weeks, the organization of schemes by newspaper firms to protect their staffs, offices and works will be a matter that will receive considerable attention.

Inquiries made by the Newspaper World in London among the leading national newspapers reveal that in most cases the subject has been under discussion, but nothing concrete has yet been done.

An official at the A.R.P. headquarters for the city said that business firms had to make their own arrangements for the protection of their buildings and staff. There is no compulsory scheme for firms at present, but the local authority will give all the assistance it can by lectures.

Sir Samuel Hoare, the Home Secretary, has announced income tax duties for firms that organize schemes, and, according to the Telegraph and Morning Post, additional steps are likely to be taken soon to insure that every employer of more than one hundred workmen shall have organized an adequate scheme for the protection of staffs and the maintenance of business.

An example of the way the problem can be tackled is provided in London by W. H. Smith & Son, Ltd., the well-known firm of wholesale news agents. This was described in the Daily Telegraph, when it was stated that the elaborate precautions had been especially taken because "the Government has emphasized that in the event of an emergency the continued distribution of newspapers would be a vital factor in maintaining public morale."

An interesting point is that all lorry drivers and their attendants transporting newspapers to the railheads will be dressed in reasonably proofed clothing. Arrangements are being made with publishers for the use of cheap wrapping paper which can be thrown away and replaced if contaminated by gas. At all points steps will be taken to replace contaminated wrappers.

The scheme involves a staff of 3,000 men and women, 2,000 of whom are in the main office in central London and 1,000 in a factory at Lambeth.

Three hundred of the 3,000 will eventually be highly trained in anti-gas, fire and first aid work, and for their benefit three lectures are being given by experts each week. Features of the firm's internal scheme will be:

A field telephone service for use in the event of a breakdown.

Supply of storm lanterns in case lighting should fail. Should escaping gas make the lanterns dangerous, thousands of bicycle lamps will be brought into use.

Loud speakers fitted throughout the building so that instructions may be issued from the control room to avert panic.

Alternative accommodation for every department to prevent a fire or bombardment from causing a breakdown in organization.

Bed-rooms in the office of the use of the staff who may be working in shifts during an emergency, and a big canteen service in case the air raid should be prolonged.—From The Newspaper World, London.

Two thin garments—warmer than one thick one, because the air between them acts as insulation.

SUNDAY SCHOOL LESSON

MAY 15

TESTING DISCERNIBILITY BY SERVICE

Golden text: Come, follow me. Mark 10:21.

Lesson: Mark 10:17-31.

Devotional reading: John 15:8-16.

Explanations And Comments

The Testing of the Young Ruler. Mark 10:17-22. One day a young man, a ruler of the synagogue Luke calls him (18:18), hurried up to Jesus and kneeling before him asked: "Good Teacher, what shall I do that I may inherit eternal life?"

Before answering his question Jesus said to him, "Why callest thou me good? None is good save one, even God." This remark has been taken by many, notably the Unitarians, as meaning that since the adjective "good" was not applicable to God only it was not applicable to him, and therefore he was not divine. What Jesus meant was merely to counsel his inquirer not to make ascription of goodness a matter of mere courtesy of politeness.

Then Jesus said: "Thou knowest the commandments," and recalled those that bear upon one's dealings with others. In the report as given by Matthew he added also from Leviticus 19:18 "and, Thou shalt love thy neighbor as thyself." In surprise the ruler said, "Teacher, all these things have I observed from my youth." Jesus' words disappointed the young man grievously. He felt the Syrian general when the prophet sent him to take a bath in the little, shallow, muddy Jordan. He had expected to be given some spectacular, heroic task; he had hoped for some new, engaging duty; and here was nothing but the old commandments, every one of which he had known by heart for years.

"One thing thou lackest," said Jesus then to the young man; "Go, sell whatsoever thou hast, and give to the poor, and thou shalt have treasure in heaven; and come, follow me."

The sacrifice asked was too great for the young man to make.

Britisher Pays Taxes

Average Citizen Pays One-Sixth Of Income To Government

Great Britain's average citizen will pay a \$2,500 a year job in a city office, wife, two children and a \$4,000 suburban home twice or three months each year for the government.

Professional calculations estimated that he pays one-sixth of his income in taxes, figuring in recently announced increases in income and other taxes.

For a start the government takes \$50 annual income tax. Another \$60 based on the rated value of his home is assessed. Local government authorities take about \$25 in rates—local taxes to maintain police, streets, poorhouses. On top of that comes the water rate averaging \$10 annually.

The early morning cup of tea his wife brings him in bed is already taxed like the cigarette he smokes while dressing and the match he uses to light it.

But he has the patriotic satisfaction of knowing that one-fourth of the 48 cents a pound he pays for tea goes partly to buy airplanes, guns and battleships.

At breakfast time the radio music reminds him he pays \$2.50 yearly for the privilege of owning a radio set.

Breakfast itself is sort of a sacrificial feast honoring the lord high tax collector.

Nearly four cents of the 20 cents a pound price for prunes is imported duty—as is one-eighth of the eight cents a pound he pays for sugar.

Two of the eighteen cents for a four-pound loaf of bread goes for when import duty and the milling tax hit the British farmer.

His 10 horsepower automobile nets the government \$37.50 annually. His driving license costs another \$12.50.

Of the 40 cents he pays for a gallon of gasoline, 18 cents goes to the government.

If he keeps a dog another \$1.87 goes for a license.

When he takes his wife to the suburban movies each 24-cent ticket includes a six-cent tax.

Fourteen cents of the 24 he pays for an ounce of pipe tobacco also goes to the government.

A box of 50 matches costs two cents, but nearly one cent is tax.

And when he dies, the widow pays death duty—\$10 if he leaves \$1,000, \$50 if he leaves \$9,000 and \$180 if he was worth enough to have accumulated \$6,000.

Although Captain Cook, famous explorer, died more than 150 years ago, a tortoise, which belonged to him still is alive and flourishing on the Island of Tonga, where it enjoys the native rank of chief.

English rivers wash more than 2,000,000 tons of solid matter down to the sea every month.

The Israelites had marbles with them when they made their 40-year journey.

Health LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST
by DR. J. W. S. McCULLOUGH

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at one price may secure same by writing to The Health League of Canada, 105 Bond St., Toronto, Ont.

Gardening

The first flowers to be sown are these very hardy kinds which would naturally reproduce themselves in Canada, such as cosmos, calliopsis, poppy, alysium, calendula and candy-tuft.

In the second group are the zinnia, marigold, nasturtium, stocks, aster and petunia, which do not stand serious frost, and of the tender things, which must be held back until all danger of freezing is over, are the dahlia, canna and gladiolus. As the latter are all bulbs and do not come up until a week or so after planting, they may be risked within a few days of the arrival of really warm weather.

Vegetable gardens should be very productive affairs. Where space is limited it is possible to grow two crops, even in those sections of the province where the summer season is inclined to be short. This is done by upturning rows of very early stuff like lettuce, radish and spinach in between later maturing vegetables such as corn, tomatoes, pumpkins and Swiss chard. By the time the latter things are beginning to need full room, the first named group will be used and out of the way.

Undoubtedly the average amateur gardener loses more by cussing the season than in planting too late. The sharp frost in May will often completely ruin a promising early start, or at least set the hardy things so far back that the later planted sorts will actually be ahead.

There is no objection, however, in getting started early. There is more to be gained by the use of the first and more satisfaction in the first meal of peas or potatoes right from the garden. The door than in a dozen later on. But there should be a certain amount of judgment used.

Fate Of Shanghai

Is Becoming A Tragic Question To The Far East

Fate of Shanghai, developed in a century from a mudbank with scattered Chinese huts, to one of the greatest cosmopolitan, financial and industrial centres of the world, now ranks as one of the important—and tragic—questions to the Far East.

There is the actual war destruction and directly attendant losses, to be reckoned with. This has been estimated at \$300,000,000, including actual physical destruction and first-hand losses in trade.

Trade has dropped 70 per cent.—directly attributable to the war. From February to July in 1937 Shanghai's trade, exports and imports, totalled \$659,400,000 in Mexican dollars. From August, 1937 to January, 1938, they totalled only \$196,820,250. It follows that the factories not destroyed are idle, warehouses empty or loaded.

Has Fortune In Opals

World Traveller Plans To Build Hospital With Proceeds Of Sale

Proper Ralston, 46, world traveller, author and musician, who is known as the "Opal King," and "The Man With The Harp," arrived in New York City from British Honduras with a fortune in opals, the result of ten years spent in Australian opal mines, one of which he owned. The stones, worth hundreds of thousands of dollars, are in a safety vault in New York City.

It is Mr. Ralston's intention to build a factory either at Niagara Falls, Ont., or Niagara Falls, N.Y., for the cutting of the stones. He intends to use the proceeds of the sale of these stones for the completion of his jewel-encrusted "dream harp." Ultimately he intends to devote his fortune to the establishment and maintenance of a hospital, either in Canada or the United States.

Thought For Every Day

"Accidents Don't Happen," says the National Safety Council, in its 1938 accident prevention campaign. "Accidents Are Caused."

Just cogitate on that one for a few minutes and then type it off on a piece of paper and paste the paper on the dashboard of your car where you'll see it every time you get behind the wheel.

"Accidents Don't Happen... They Are Caused."

Some articles of household furniture a used, car, any other things you would like to turn into cash? Just look around. Somebody might buy if they knew. Advertisements under this

Rev. Miss Mooshian Will Tell of Evangelistic Meetings in Spokane. Rev. C. H. Mooshian, B.A., in charge; G. Berglund assistant and organist.

Services: Sunday at 11 a.m. Sunday school at 1 p.m. Evening evangelistic service at 7.30. Tuesday at 7.30 p.m., prayer meeting.

Friday at 7.30 p.m., regular gospel service.

This Friday evening Miss Mooshian will give an interesting address on her recent trip and meetings held in Spokane, Wash. Bring your friends. You will enjoy the hearty singing and

COMMAND ATTENTION

There is nothing to equal a well printed poster from The Journal office to advertise dances, socials and other events, besides display advertising in this paper. Good printing gives a good impression of that which it advertises, and you get THE BEST at this office.
